

Mohale Boniwe Sthembiso

COMPUTER SYSTEMS ENGINEER

Phone: 0665962195

Email: boniwesthembiso@gmail.com

Address: Pretoria , South Africa

PROFESSIONAL SUMMARY

I am a dedicated individual driven by a passion for technology and innovation. I believe in the power of tech solutions to simplify and enrich everyday life, and I am continually seeking opportunities to expand my knowledge and skills. I am deeply inspired by the potential of technology to solve real-world challenges, and I am committed to contributing to the creation of accessible, user-friendly, and impactful solutions that make a meaningful difference in people's lives.

EDUCATION

Diploma In Computer Systems Engineering | 2021-2026

Tshwane University Of Technology , Sosh South Campus

- Relevant Coursework: Communication Science, Digital Electronics, Electrical Principles, Electronics, Mathematics, Programming, Network Systems, Project Construction, Computer Architecture and Organisation, Databases, Digital Process Control, Mathematics (second-year), Programming (second-year), Logic Design, Operating Systems, Programmable Logic Controllers, Artificial Intelligence, Mobile Robotics, Embedded Systems, Probability and Statistics, Project Design, Software Engineering, Work-Integrated Learning

Bachelor's Degree | 2020

Semarela Secondary School

- Relevant Subjects : Mathematics, Life Sciences, Geography, Physical Sciences, Life Orientation, English FAL, Sepedi HL.

WORK EXPERIENCE

Cybersecurity And Networking Intern | 08/2025 – 07/2026

4IR LAB, TUT South Campus

- Monitored and analyzed security alerts using SIEM tools
- Identified and mitigated network vulnerabilities
- Assisted in penetration testing and security assessments
- Investigated incidents and escalated critical threats
- Performed malware analysis and threat investigation
- Developed automation scripts for security processes
- Configured and deployed networking equipment
- Maintained system documentation and hardware inventory

SKILLS

Core Skills

- Excellent written and verbal communication
- Strong interpersonal and relationship-building skills
- Empathetic and persuasive communication
- Strong organizational and time management skills
- Analytical thinking and problem-solving
- Leadership and team collaboration

Technical Skills (Cybersecurity)

- Excellent written and verbal communication
- Strong interpersonal and relationship-building skills
- Empathetic and persuasive communication
- Strong organizational and time management skills
- Analytical thinking and problem-solving
- Leadership and team collaboration

Security Frameworks & Tools

- Excellent written and verbal communication
- Strong interpersonal and relationship-building skills
- Empathetic and persuasive communication
- Strong organizational and time management skills
- Analytical thinking and problem-solving
- Leadership and team collaboration

Programming Languages

- C, C++, C#, .Net, Unity
- Python , MySQL
- PLC Programming
- Cisco Packet Tracing , Processing , Java
- Assembly Language

PROJECTS

Azure Honeypot SIEM

- Deployed a cloud-based honeypot on Microsoft Azure to attract real-world cyber-attacks by exposing vulnerable services to the public internet.
- Configured and integrated a SIEM solution to aggregate, analyze, and correlate attack logs in real time.
- Visualized live threat intelligence, including attacker geolocation, frequency of attacks, and attempted exploit patterns, providing actionable security insights.

Threat Detection, Simulation, Automation & SIEM (Elastic Stack)

- Deployed a cloud-based honeypot on Microsoft Azure to attract real-world cyber-attacks by exposing vulnerable services to the public internet.
- Configured and integrated a SIEM solution to aggregate, analyze, and correlate attack logs in real time.
- Visualized live threat intelligence, including attacker geolocation, frequency of attacks, and attempted exploit patterns, providing actionable security insights.

SOC Automation Lab (Wazuh & Splunk)

- Established a comprehensive SOC lab environment integrating Wazuh for endpoint detection and response (EDR) alongside Splunk for centralized log aggregation and correlation.
- Developed custom dashboards in Splunk to monitor security events, system integrity, and compliance metrics in real time.
- Automated alerting and incident response workflows, reducing manual intervention and improving mean time to detection (MTTD) and response (MTTR).

Phishing Detection System

- Developed a system to automatically identify and analyze phishing campaigns targeting enterprise environments.
- Utilized email header analysis, domain reputation scoring, and payload inspection to classify suspicious emails and block malicious senders.
- Created reporting mechanisms to document detected threats, enabling security teams to respond quickly and improve user awareness training.
